'Falling in love at the Garden Party'

Green Graphite has been commissioned once again to create a visual delight exploring the concept of 'The Garden Party'. This year's sculpture garden focuses on cosy corners and entertaining, inviting the use of the garden, terrace or balcony as an integral part of the living space whatever the season.

Intimate spaces within the garden have been created to retreat for quiet contemplation or more open areas for picnic blanket parties, touching distance from the sculpture where they become part of the conversation.

Using a rich diversity of texture, colour and drama, Green Graphite and its partners Lindum Turf, Chelsea Gardener, Artscape, Barbed and Mykon, have created an exciting environment to inspire, enjoy and engage with.

Luscious lawn and striking foliage compliment pieces of contemporary furniture design along with cutting edge technology, highlighting our use of outdoor space and enjoyment of art within it.
