

### 'Eccentric (Not Circular)'

This year, Green Graphite's Sculpture Garden for the Affordable Art Fair celebrates the unique, the diverse and the eccentric in us all, drawing attention to the role individuals play in creating a sustainable and self-sufficient environment.

Working with the horticultural charity Thrive, Lindum Turf, Barbed Interiors and some of the UK's most innovative new artists, we combine art and edible gardens to a flamboyant effect.

Inspired by colourful Victorian bedding displays, we are using large circles of luscious lawn intersected by vividly-coloured 'paths' surrounded by seasonal vegetables, herbs and exotic plants that are interspersed with inspiring sculpture. We are also using recycled materials, including the original planters from the Festival of Britain (1951). All the makings of a delicious space!
