

# Green Graphite

## Landscape Design

---

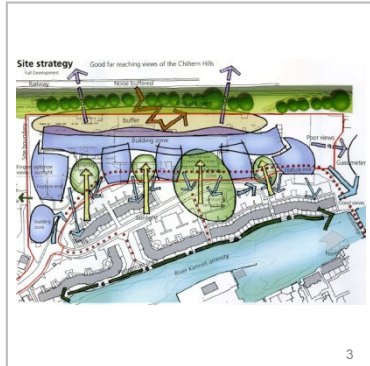

Green Graphite strives to achieve **professional integrity**, **creativity** and **design excellence**. We specialise in challenging projects while offering a personalised service and a **collaborative approach** with clients and consultants.

The foundation of services we offer is based on our project experience in historical landscape, healthcare and special needs schools, residential development, environmental impact assessment (EIA) and Geographical Information Systems (GIS).

Green Graphite is able to provide services from inception to project completion including advice during the early stages of planning, assisting our clients in appointing qualified landscape contractors, pre-construction meetings, site visits and guidance after completion of contract.

This **attention to detail** throughout ensures a successful project that is installed as intended and offers **years of value** for the user.

1. Residential development;  
Former Metropolitan Police training ground,  
Hounslow, London
